PERSONAL STATEMENT

I'm self motivated and self taught with a focus towards front end technologies. I've spent the last two years dedicated to learning as much as I can about web development.

PROJECTS

Mulberry Fitted Kitchens

<https://www.mulberrykitchens.co.uk>

A brochure website with integrated CMS for easy updating.

F1 Calendar

<https://fathomless-ocean-33259.herokuapp.com>

Upcoming Formula 1 race dates and times with results for past races.

EDUCATION

Free Code Camp — [Front End Development Certification](#)

Free Code Camp covered HTML, CSS and Javascript. To earn their certification, they had me complete a number of projects which can be viewed from my portfolio.

EMPLOYMENT HISTORY

Mulberry Fitted Kitchens

AUGUST 2006 - PRESENT

Mulberry is a small company and I have found myself filling any role when needed, which I have listed below.

Key responsibilities

- Solely responsible for Mulberry's web presence.
 - Built their website.
 - Set up social media accounts.

SKILLS

HTML, CSS, Javascript, React, Gatsby, GraphQL, Node.js, express.js, mongodb, git, Bootstrap, jQuery, Grunt.js

SOCIAL MEDIA & PROFILES

Github: /danbarber88

Free Code Camp: /danbarber

Codepen: /danbarber88

- Set up Google My Business and enabled reviews.
- Designing all advertisements Mulberry needed for any campaigns they decide to run.
- Answer phone calls.
- Greet and answer questions from customers browsing the showroom.
- Handle all incoming invoices and enter them into our system.
- Take incoming deliveries to the warehouse and sort them into their proper place.
- Assist the delivery driver with any deliveries that require two people.

Key achievements

- I had the opportunity to update Mulberry's website for them which can be viewed in my portfolio. Their previous site was not responsive and while it was once perfect for them, it had not kept up with the latest screen resolutions and had started to show its age.
- I worked alongside a director to create a virtual reality headset very similar to google cardboard. We now hand out the headsets to prospective clients so they can view their kitchen design in VR.
- Developed a quicker solution for entering all of their invoices using Microsoft Access, saving many hours of manual work for the directors.
